

Inmagic Genie v2.00 Service Pack 1

This Service Pack addresses the following issues found in Genie v2.00. Applying this Service Pack is optional. Review the issues addressed to determine if they are needed for your system.

1. Loans lending screen now populates the Due Date box even if there is only 1 item in the Loan Term dropdown list. [SPR 3065]
2. Loans lending screen now permits viewing reserves even if the list of bar codes includes a trailing line break (as might happen if the bar codes are scanned in). [SPR 3068]
3. The ILL module now works properly even if host headers are in use at the web site. [SPR 3436]
4. Orders can now be edited even if they contain bad or missing List Price or Number of Copies information. Reports that encounter similar problems in Orders now have more informative errors displayed. [SPR 3124]

Applying the Service Pack

- 1) If you have not done so already, stop the World Wide Web Publishing service using your operating system's Services window.
- 2) Click the Genie20SP1.zip link to download and save the Genie 2.0 service pack to your hard drive.
- 3) Unzip Genie20SP1.zip to a temporary directory and run Setup.exe.
- 4) When prompted for the installation directory, browse to the folder that contains your Genie v2.0 software and click "Next".
- 5) Click the Finish button and restart World Wide Web Publishing Service from the Services window.

Question:

How do I tell if this service pack has been installed?

Answer:

There are two ways to determine that this service pack has been installed:

1. The "About Genie" link will indicate that the Genie version is 2.00.1.
2. Right click on the Genie DLL in the bin directory and select Properties. It will show that the version number is 2.0.1.16028
