

## **Inmagic Presto v1.10 Service Pack 2**

Applying this Service Pack is optional. Please review the issues addressed in this Service Pack to determine if they are relevant to your deployment and implementation of *Presto* v1.10.

**Purpose:** To address the following issues -

1. No "Back to Organize .... Collection" Button. When you add a new item from the collection window, the button to return to the "Organize Collection" area is not available. [SPR1428]

The following issues were originally addressed in *Presto* v1.10 Service Pack 1. Service Packs are cumulative; therefore, these issues are also addressed in this Service Pack, *Presto* v1.10 Service Pack 2

1. Next and Previous buttons not functioning correctly. After accessing a record via the "Summary By Type" screen, the Next and Previous button do not take you to the next and previous records, but instead take you to the first record in the last Content Type in the search results. [SPR1268].
2. Sort By selection not maintained when searching via "Filter these Search Results." [SPR1289]
3. When importing instance data using contentloader, records that have no value in a Property with a LogicalRepresentation Type="file" (binary) get rejected with an error of "Empty path name is not legal". [SPR1302]
4. Implementation of the Adobe .pdf IFilter may be unsafe in certain multi-user scenarios. [SPR1307]
5. If a user content record has a NULL or Empty value for a multi-value property, this empty value should not be created in the sub-table for this property. [SPR1308]
6. The searches of value lists (and all pop-ups, like users) are slow for large lists. [SPR1313]
7. When exception files are created during an import, the original import settings are lost. [SPR1316]
8. Labels for text properties appear if the data for the field is empty on summary screens when the <SurpressControllfEmpty> element is "true" if a label is present. [SPR1317]
9. Clearing property in Import/Match incorrectly coded. [SPR1321]
10. Lookup box directions always contain text "State7 MSPL" instead of the actual field name. [SPR1331]
11. Version Number displayed incorrectly in "About" box. [SPR1332]
12. Cannot "hide" the names of the fields that are not populated on Detail Display screen and other output screens. [SPR1337]

### **Installation instructions for applying the *Presto* v1.10 Service Pack 2**

1. Run the setup.exe.

2. Select the instances of the application to which you wish to apply the Service Pack.

Note that a Service Pack cannot be uninstalled.

If you have any questions or problems with this Service Pack, contact [support@inmagic.com](mailto:support@inmagic.com).
