

Inmagic DB/TextWorks Run-Time v9.02

DB/TextWorks Run-Time v9.02 is a minor bug fix release intended to replace DB/TextWorks Run-Time v9.00.

The following issues are addressed in this product release:

1. Running DB/TextWorks or Setup Workstation from a mapped drive fails. [SPR 3574]
2. Errors displaying specific PDF files in Images window [SPR 3571, SPR 3676]

Please note that DB/TextWorks Run-Time v9.02 is available only as a download from the Inmagic website. The DB/TextWorks v9.00 product distribution has not changed and continues to bundle Run-Time v9.00.

Installation instructions for installing DB/TextWorks Run-Time v9.02

These instructions are for both new and upgrade installations.

1. Extract DBRuntimeV902.zip to a temporary directory.
2. Navigate to the temporary directory and double-click on setup.exe.
3. When the Run-time setup program launches, you will have the opportunity to install Run-time to the default Inmagic folder or browse to another folder.
4. Click "Next".
5. Click the "Finish" button when Setup is complete.
