Inmagic DB/TextWorks (non-SQL platform) v16.0 System Requirements
Operating Systems
Windows Server 2016
Windows Server 2012 R2
Windows Server 2008 R2
Windows Server 2008 SP2 (32-bit or 64-bit)
Windows 10 (32-bit or 64-bit)
Windows 8/8.1 (32-bit or 64-bit)
Windows 7 SP1 (32-bit or 64-bit)
Note: Installation of the software on a Domain Controller is not supported.
Inmagic DB/SearchWorks Run-time software (included with DB/TextWorks)
Operating Systems
Windows 10 (32-bit or 64-bit)
Windows 8/8.1 (32-bit or 64-bit)
Windows 7 SP1 (32-bit or 64-bit)
Notes
The Run-time software is a standalone, search only version of DB/TextWorks that allows outside users to search a textbase.
The Run-time software is not intended for network use. It may be installed on a single machine, not a server.
Each copy of the Run-time software requires exclusive access to a single textbase and permits only one instance of the software to run at a time.
