Support Matrix for Inmagic DB/Text PowerPack and PowerPack Lite v15
Operating Systems
Windows Server 2012 R2
Windows Server 2008 R2 (64-bit)
Windows Server 2003 R2 (32-bit or 64-bit), deprecated (support will be removed in the future)
Notes
PowerPack consists of three Windows Services: the Updater, the Checker, and the Importer. **PowerPack Lite** does not include the Importer. The services must be installed on a machine that has access to the DB/TextWorks textbases that you will maintain. The services must be installed on a machine that will not need to be rebooted frequently, as this disrupts ongoing services. PowerPack and PowerPack Lite are compatible with textbases maintained with DB/Text versions 15.0 and later.
