Genie Web Server Requirements		
Genie and WebPublisher PRO must be installed on the same server.		
Genie v3.5 is supported for use with WebPublisher PRO v12 or later (SQL or non-SQL). Please consult the Documentation page on the Customer Extranet to find the WebPublisher PRO server requirements for the version and platform of your WebPublisher application. Note that ASP is not required in order to edit records with Genie.		
Genie Client Web Browser Requirements		
Supported Web Browsers	**Operating System**	**Notes**
MS Internet Explorer 7 - 9	MS Vista MS Windows 7 MS XP with SP2	The ScriptX ActiveX control must be installed on the client if there is a need to print labels and/or specific reports. This is not a pre-installation requirement, as this can be installed when it is first required. (The ScriptX software is installed with Genie.)
Mozilla Firefox 3.0 or later, for search/display only	same as above	ScriptX is not supported for use with browsers other than IE.
